MAS

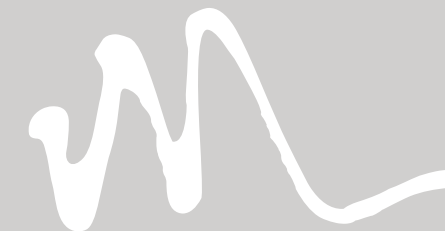

Ogni cosa che ci circonda ha mille possibilità di vita, mille modi di comunicare significati, di volta in volta diversi quando incontra l'anima delle persone. Ci piace così sperimentare la modernità delle tecnologie con la tradizione dei materiali, muovendoci alla scoperta di altre forme espressive. Ci piace scommettere sul futuro senza mai perdere di vista il passato, unica chiave di accesso per capire come potrebbe essere o come sarà.

1

Everything around us has infinite possibilities of life, meanings and ways to resonate with people. We experiment new technologies and use traditional materials, explore alternative forms of expression, and face the future without losing sight of the past, our access key to understanding how it could or will be.

Tout ce qui nous entoure a des potentialités de vie infinies, des sens différents, mille façons de nous «parler». Ainsi, nous aimons expérimenter et associer technologies de pointe et matériaux traditionnels, explorer des formes d'expression alternatives et miser sur l'avenir sans perdre de vue le passé, clé d'accès pour comprendre ce qui pourrait être ou ce qui sera.

Il sistema consegne. La nostra azienda, impegnata nel continuo miglioramento della propria organizzazione, mettendola al servizio dei propri clienti, lavora in sinergia con i migliori corrieri espressi, che garantiscono costantemente ottimi risultati in termini di tempestività nelle consegne e qualità del servizio.

The delivery system. Our company, committed to continuous improvement of its organization, putting it at the service of its customers and works in synergy with the best express couriers, which provides consistently excellent results in terms of timely delivery and quality of service.

Le système de livraison. Notre entreprise, s'engage à l'amélioration continue de son organisation, la mettant au service de ses clients et travaille en synergie avec les meilleurs coursiers, qui fournissent constamment d'excellents résultats en termes de livraison et la qualité des services en temps opportun.

Il sistema manutenzione. Nel tempo, per ostacolare il naturale invecchiamento, è possibile rinfrescare la protezione dei pannelli con una semplice operazione di pochi minuti.

- Manutenzione ordinaria: pulizia con panno umido e trattamento a cera.
- Manutenzione straordinaria: utilizzo del "Mas Beauty Kit", il corredo necessario per conservare il legno in ottime condizioni e per preservarne l'originale bellezza.

The maintenance system. To preserve the panels from ageing, take a few minutes to protect them.

- Ordinary maintenance: clean with a damp cloth and treat with wax.
- Extraordinary maintenance: use our "Mas Beauty Kit" that contains everything you need to keep the wood in good condition and to maintain its original beauty.

Le système d'entretien. Quelques minutes suffisent pour protéger les parements du vieillissement naturel.

- Entretien courant: nettoyez avec un chiffon humide et traitez à la cire.
- Entretien spécial: utilisez notre "Mas Beauty Kit" contenant tout ce dont vous avez besoin pour protéger et conserver la beauté originale du bois dans le temps.

Il sistema espositore. Studiato appositamente per gli spazi espositivi dei nostri rivenditori, è il miglior strumento per una presentazione ordinata e funzionale dei prodotti all'interno di ciascun punto vendita.

The displaying system. Designed specifically for our dealers' showrooms, the display rack is the best and most functional tool to show the products.

Le système d'exposition. Conçu spécialement pour les points de vente de nos revendeurs, le présentoir est le meilleur outil pour exposer les produits de manière ordonnée et fonctionnelle.

3

Su richiesta si può effettuare un ciclo di verniciatura "ADLER" con garanzia di 10 anni.

An "ADLER" painting cycle can be carried out upon request, with a 10-year warranty.

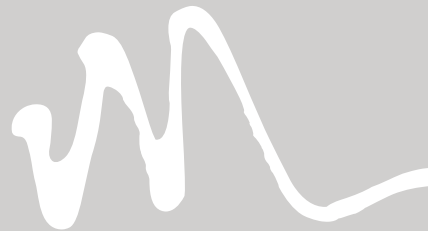

Sur demande, un cycle de peinture « ADLER » peut être réalisé avec une garantie de 10 ans.

FINITURE

Le grate metalliche, realiz-
zate in acciaio e disponibili
in finitura inox, corten o ac-
ciaio verniciato Ral, posso-
no essere inserite su tutti i
modelli Mas, previa consul-
tazione dell'ufficio tecnico
per vericarne la fattibilità.

Per modelli e finiture delle
grate vedere a pag. 238.

FINISHINGS

Steel-made metal grilles,
available in stainless, wea-
thering or Ral painted steel
finishings, can be mounted
on every Mas model, upon
approval by the technical
department for suitability.

See p. 238 for grille models
and finishings.

FINITIONS

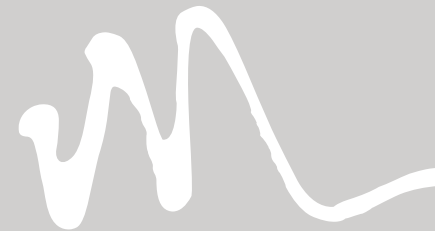

Les grilles métalliques, en
acier et disponibles en fi-
nition acier inoxydable, en
corten ou en acier peint
Ral, peuvent être insérées
sur tous les modèles Mas,
après consultation du ser-
vice technique pour en
vérifier la faisabilité.

Pour les modèles et les fi-
nitions des grilles, voir la
page 238.

Cos'è la Krion Eco-Active Solid Technology?

La KRION Eco-Active Solid Technology® è il salto rivoluzionario fatto dal Krion® nel mondo della Solid Surface. Lo scopo di questa nuova tecnologia del Krion® Eco-Active è conferire al materiale numerose nuove proprietà, basate sul fenomeno naturale della fotocatalisi. Si ottiene così un prodotto innovativo ed esclusivo a livello mondiale (che sta per essere brevettato), in armonia con la natura, durevole nel tempo e con un effetto diretto sulla qualità di vita. Queste nuove proprietà del materiale non ne alterano le qualità fisiche, né il colore, non ne limitano l'impiego: non si tratta di un semplice trattamento superficiale e non è presente alcun componente pericoloso.

COME FUNZIONA?

Il segreto della nuova tecnologia presente in Krion® Eco-Active risiede nell'immissione in tutto il prodotto di una serie di attivatori, appositamente sviluppati per il Krion®, che conferiscono le seguenti nuove proprietà al Krion® Eco-Active quando vi incide qualsiasi tipo di luce: purificazione dell'aria, potere antibatterico, autopulizia ed eliminazione dei prodotti chimici.

KRION®
PORCELANOSA
SOLID SURFACE

KRION Eco-Active Solid Technology® is the revolutionary breakthrough made by Krion® in the world of Solid Surface. The purpose of this new technology of Krion® Eco-Active is to give the material many new properties, based on the natural phenomenon of photocatalysis. In this way an innovative and exclusive product is obtained worldwide (which is going to be patented), in harmony with nature, lasting over time and with a direct effect on the quality of life. These new properties of the material do not alter the physical qualities, nor the color, do not limit its use: it is not a simple surface treatment and there is no dangerous component.

HOW DOES IT WORK?

The secret of the new technology present in Krion® Eco-Active it resides in the insertion in all the product of a series of activators, specially developed for Krion®, which gives the following new properties to Krion® Eco-Active when it affects any type of light: air purification, antibacterial power, self-cleaning and elimination of chemicals.

KRION Eco-Active Solid Technology® est la percée révolutionnaire de Krion® dans le monde de Solid Surface. Le but de cette nouvelle technologie de Krion® Eco-Active est de donner au matériau de nombreuses propriétés nouvelles, basées sur le phénomène naturel de photocatalyse. De cette façon, un produit innovant et exclusif est obtenu dans le monde entier (qui va être breveté), en harmonie avec la nature, durable dans le temps et avec un effet direct sur la qualité de vie. Ces nouvelles propriétés du matériau n'altèrent pas les qualités physiques, ni la couleur, ne limitent pas son utilisation: il ne s'agit pas d'un simple traitement de surface et il n'y a pas de composant dangereux.

COMMENT FONCTIONNE-T-IL?

Le secret de la nouvelle technologie présente dans Krion® Eco-Active il réside dans l'insertion dans tout le produit d'une série d'activateurs, spécialement développé pour Krion®, qui confère à Krion® Eco-Active les nouvelles propriétés suivantes lorsqu'il affecte tout type de lumière: purification de l'air, pouvoir antibactérien, autonettoyage et élimination des produits chimiques.
